SELFLEVEL® Access Assembly

Improve driveability while reducing road maintenance, inflow, and infiltration. Available for asphalt and concrete applications.

SELFLEVEL assembly floats with the roadway, keeping the surface smooth during settling and frost heave.

Protecting the structure below, traffic vibration is absorbed by the road surface.

An excellent solution for new or retrofit installations.

Visit r.ejco.com/lunch to request a lunch and learn demo or call 800 626 4653.
